

## Security Onion Solutions Sensor for FireEye Helix Download Instructions

The Security Onion Solutions Sensor for FireEye Helix enables customers to gain visibility into their network. Begin using the Security Onion Solutions Sensor by following these two steps:

### **STEP 1: Download the ISO image file:**

<https://github.com/Security-Onion-Solutions/securityonion-hh-iso/releases/download/HH1.1.3/HH-1.1.3-21.iso>

### **STEP 2: Use these login credentials once the image is applied, to start the set-up:**

Default Username: onion

Default Password: V@dal1aZ

### **Extension Info:**

MD5: 0FDACF6A2BB63B390C4D7FA46CCA3AA5

SHA1: 20506D5C535CF5D0E2F7440C8ACBE9D318049B7D

SHA256: EAAE7DC173F0E91BED43BDA13A84A20167975B5F7BD6598BE2D434AB29EAC51B

Security Onion is a free and open source Linux distribution for intrusion detection, enterprise security monitoring, and log management. It includes Elasticsearch, Logstash, Kibana, Snort, Suricata, Bro, Wazuh, Sguil, Squert, CyberChef, NetworkMiner, and many other security tools, helping customers 'peel back the layers' of their networks.

In addition to the sensor, Helix offers over 10 Security Onion dashboards that enable customers to detect and respond to attacks, identify anomalies quickly, and hunt for attackers using contextual data beyond alerts.
